Getting Clear Starts Here

In order to get clear about your career strategy, you must recognise what you believe about your career. Brainstorm using the prompts below.

Define
your
career
clarity

**WHAT IS A
CAREER?**

**DOES YOUR
CAREER HAVE A
PURPOSE OTHER
THAN YOUR
SALARY?**

Discover & Explore Your Mindset

Step 1:

What do you tell yourself about your career potential?

2

Discover
how your
mindset
influences
your
actions

Step 2:

Are you a victim to your career obstacles?
How do you stay accountable to your career aspirations?

Step 3:

How does fear, challenge, and potential sound like in your head?

What Else Can You Do?

Make a list of 25 other jobs that you can do if you were not doing the job you are right now. Stretch yourself outside your comfort zone. Consider the most impossible or ridiculous things if you have to.

“ Stop assuming that your job is your career. Once you change your mindset, you realise that your job is a milestone and its aim is to teach you something that you will use on the next milestone. The process continues until you arrive at your final destination.”
